1 Highlighting indentation for Emacs

Provides two minor modes `highlight-indentation-mode` and `highlight-indentation-current-column-mode` (modified version from @krestenkrab <https://gist.github.com/151043>)

- `highlight-indentation-mode` displays guidelines indentation (space indentation only).
- `highlight-indentation-current-column-mode` displays guidelines for the current-point indentation (space indentation only).

<http://i.imgur.com/TUyPH.png>

Appearance of guidelines is customizable by changing the face `highlight-indentation-face` and `highlight-indentation-current-column-face`.

Example, colors from screenshot:

```
(set-face-background 'highlight-indentation-face "#e3e3d3")
(set-face-background 'highlight-indentation-current-column-face "#c3b3b3")
```
